**Re: Investing in Cochrane's community infrastructure.**

Cochrane has a great sense of community, where you can expect hospitality and friendly smiles from residents and business owners alike. However, there are a few areas where our community needs support to ensure Cochrane remains a great place to live.

As more people move to Cochrane, we're facing some challenges in important areas like affordable housing, recreational facilities, seniors housing, and downtown revitalization.

Our seniors population is growing fast, and it's important that they have good **seniors lodging** options so they can live comfortably and with dignity.

Many residents are struggling to find **affordable housing**. Stable funding will ensure that everyone, regardless of their financial situation, can find a place to call home in Cochrane.

With more people coming to Cochrane, our **recreation facilities** are becoming increasingly busy, making it challenging for residents to access them. Investing in new facilities and upgrading existing ones will help meet the growing recreational needs of our community.

Our downtown is the heart of Cochrane, where we shop, eat, and socialize. Investing in **downtown revitalization** would create new opportunities for businesses and residents and make it even better.

I'm asking the Provincial government to partner with Cochrane in these critical infrastructure projects. Your support will make a significant difference in the lives of all Cochrinites and ensure our community continues to thrive.

Thank you for your time and consideration.

Sincerely,
