

# HOW TO CLEAN REUSABLE FACE COVERINGS

- Fabric face masks should be routinely washed depending on the frequency of use.
- A washing machine should suffice in properly washing a face covering.
- If washing by hand, do so in warm or hot water and scrub, agitating it for at least 20 to 30 seconds.
- Individuals should be careful not to touch their eyes, nose, and mouth when removing their face covering and wash hands immediately after removing.
- Make sure to completely dry cloth face covering after washing.
