Re: Improvements in health care and EMS

As a resident of Cochrane, I'm reaching out to share my thoughts about healthcare and emergency medical services (EMS) in our area.

One big concern I have is making sure we have ambulances available when we need them. It's important that we can rely on getting help quickly in emergencies.

Another thing on my mind is having urgent care open 24/7 in Cochrane. It would be a big help if we could get medical attention overnight, so we don't need to travel to Calgary late at night.

We also need more family doctors and Cochrane. Having local doctors means we can get regular healthcare without having to go to the emergency room for simple things.

I appreciate the opportunity to share the perspective of Cochrane residents during the recently announced in-person engagement sessions and online forum hosted by the Province. I will take advantage of these opportunities.

I'm asking for your help to improve ambulance services, make urgent care available around the clock, and find ways to get more family doctors in Cochrane.

Thank you for your time and consideration.

Sincerely,

[Your Full Name]
