Go slow on the H20

It's going to be another beautiful weekend in Cochrane!

While you enjoy the outdoors, keep our water wise tips in mind:

- Water outside before 10 a.m., or after 7 p.m. Cochrane's level one watering restriction is in effect year-round.
- Use surface and underground sprinklers for no more than 15 minutes per section of lawn. If water is running onto the street, shut it off.
- Children may use sprinklers, pools and water toys at any time during the day. Shut off water when they are not using them.

Black Henbane: Invasive noxious weed

Black Henbane is a noxious weed under the Alberta Weed Control Act. A single plant can produce up to 500,000 seeds, making early control important.

All parts of the plant are poisonous if ingested and contact with skin can cause irritation

If you're removing Black Henbane:
- Wear gloves, long sleeves and pants
- Pull or dig the plant out at the root
- Bag plant material and place it in the garbage (black bin). Do not compost or use the green bin.

Check the current status before you start a fire.
