Winter organics collection tips

- **Lining and layering**
Line the bottom and sides of your organics cart with newspaper/cardboard. This reduces the possibility of organics freezing to the cart when the temperature drops. Layering is even more important during the time of year when temperatures fluctuate frequently.
- **Keep it fluffy**
Avoid packing contents of the cart down. Organic materials may become stuck in the cart, and the truck may not be able to fully empty it.
- **Wrap it up**
Wrap wet or smelly organics in soiled boxes (from cereal or crackers), paper bags, or newspaper to help prevent them from freezing to the cart.
