Curbside Christmas tree collection Jan 6-17

Place your tree out on your regular waste and recycling cart collection day for collection.

- trees should be 1 metre from your black and blue carts
- remove all lights, tinsel, decorations and netting before disposal

Miss the curbside collection? Bring your tree to the Cochrane Eco Centre.

2025 utility rates

Effective January 1, 2025, Cochrane utility fees will be increasing to better reflect the cost of providing service and save for upgrades in the future.

While the impact will vary from household-to-household dependant on the specific usage, the average home will see a \$7.85 monthly increase.

Interested in what you can do to reduce your municipal utility costs? Visit cochrane.ca/waterconservation for some great tips.

Shovel in, not out

With the recent snowfall, please shovel snow in towards your properties - not out onto the road.

This helps keep the roads safe and aids with clearing and stormwater flow.

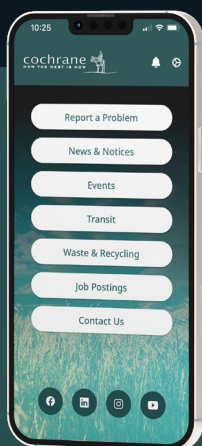

We (and your neighbours!) appreciate your hard work!

No ice is safe ice

Frozen bodies of water are dangerous!

Stay off all stormwater facilities, creeks and rivers as continuously changing water levels make it unstable and unsafe.
