CPKC Rail Safety Week

Did you know the average freight train travels at 100 km/h, requiring about 2 km to stop. That's the equivalent of the length of 18 football fields.

This Rail Safety Week 2025 (September 15-22) Cochrane is a proud to support Operation Lifesaver Canada to promote rail safety. Stay off the tracks, obey all signs and signals, stay alert and use designated railway crossings to help #STOPTrackTragedies.

You can find more rail safety tips and resources at operationlifesaver.ca

There's no competition – a train hitting a car is like a car hitting a pop can.

Don't take risks at rail crossings.
